

Credit Card Integration

Does your business need to incorporate Credit Card Processing services or already have Credit Card Processing but need to expand your ability to accept credit cards from a variety of devices and locations?

A versatile, reliable credit card processing service can help your business increase sales by enabling you to accept payment from anywhere at any time. ComEdge software can easily integrate credit card processing at an affordable cost.

Our credit card application uses tokenization which eliminates the need for merchants and e-commerce sites to store sensitive credit card data on their networks.

Benefits of a fully integrated Credit Card System

- Accepting credit cards can boost sales.
- Credit card buying tends to encourage buying.
- Accepting credit cards makes it convenient for shoppers.
- No need for a third-party payment processing product. Eliminate the middle man and reduce annual fees.
- Reduced operating costs by eliminating the need for card payment terminals and associated cost.
- Enable your business to accept credit card payments from a variety of devices including mobile applications. Accept credit cards while in the field, on the job site, on line or in the office.
- Capture pre-authorizations, authorizations, and payment information.
- Streamline payment and transaction operations. Integrated card transaction processing helps reduce data reentry by directly updating account receivable information.
- Increase customer satisfaction. Our solution is fast and reliable and will help you provide your customers efficient and consistent service.
